

Air Brake Refresher

Did you know that defective or out of adjustment air brakes play a part in nearly 30% of all commercial vehicle fatalities?

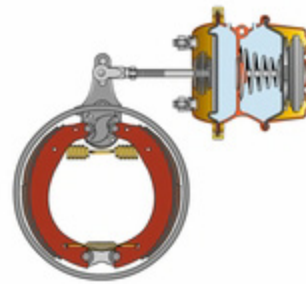

According to the Commercial Vehicle Safety Alliance (CVSA), nearly 24% of vehicles inspected during their inspection blitz are placed out of service. That is nearly 1 in 4 vehicles failing to meet the minimum safety standards as set out by CVSA.

As commercial vehicle operators, your drivers are required, as part of their daily Pre-Trip Inspection, to perform a complete Air Brake Inspection.

Even though it is part of their daily routine, do they really know what they are doing or looking for?

During this 4 hours refresher course, candidates will review:

- Introduction to Air Brakes
- The Supply / Service / Spring Brake Systems
- The trailer brake systems
- Foundation brakes and their operation
- Air brake inspection and compliance
- Air brake adjustments and verification

Don't be part of the problem. Become part of the solution by giving your drivers an air brake refresher course.

After all, WHAT IS STOPPING YOU?
