

Driver's Motor Vehicle Collision Report

This extensive 8 page Collision Report is designed to provide all the required information a driver or investigator should obtain while at the scene of a motor vehicle collision.

Simple and user friendly, a simple fill in the blanks and check box system ensures that no important detail is overlooked.

Complete with a photo taking guide and collision scene schematic, all a driver has to do is follow the booklet instructions in order to obtain the best evidence possible for further reference during an investigation or court case.

Since this information is gathered by the driver at the time of the incident, the document can be admissible in court as evidence relating to the facts of the incident.

This booklet also includes a hard cardboard backing which serves as a solid surface to write upon.
