

Fleet / Truck Check Report

You perform an in dept background check, you take them out for an evaluation and train them to meet your standards. Then, you hope that they will be the professional driver you expect them to be.

You may even subscribe to one of the many driver reporting services to ensure that your equipment is being operated in a safe and courteous manner.

Come audit time, you may find yourself with a pile of complaints regarding your drivers and /or equipment. Not many people will take the time to phone you to let you know that your driver is doing a great job. They will however call in to complain.

Fleet / Truck Check Reports are designed to report both safe and unsafe driving behaviour with an impartial eye.

A team of trained and dedicated commercial vehicle observers report both safe and unsafe behaviour.

As an observation of your vehicle is made, a report is generated and forwarded to your safety department.

The report includes:

- Date
- Time
- Location (Hwy, Town, Province)
- Unit Numbers
- Direction of travel
- Speed of vehicle
- Speed limit for area
- Lane position
- Weather and traffic conditions
- Use of seatbelt (when visible)
- Load securement (when applicable)
- Use of headlights and tail lights
- Offence committed (when applicable)
- Detailed observation

You only pay for the reports that are generated and forwarded to your company.

You and your company are being operated professionally. Why not prove it to the audit team!
