

Safety Presentations

Holding monthly meetings and having to come up with meaningful safety training can be a difficult endeavour.

Finding someone to research, set up and deliver a safety presentation can be even more difficult.

B.D.R. Safety Consulting Inc. takes the hard work out of safety presentation with a variety of readymade presentation that any of your employees can deliver with full confidence and ease.

Each presentation comes in a binder that includes:

1. PowerPoint Presentation on disk
2. PowerPoint Viewer
3. Instructional guide and notes
4. Research material pertinent to the presentation
5. Applicable handouts

Presenters simply have to read the material a few days prior to the presentation and run with it.

Each presentation is designed to be between 15 and 20 minutes in duration and is suitable for small or large groups.

Safety Presentation Subjects include:

- Stopping Positions
- Passing Safely
- How to choose tires
- Seatbelts
- Speeding, a risky behaviour
- S.I.P.D.E.
- Turning at intersections
- Proper steering
- Load Securement
- Pre-Trip Inspections
- Hydroplaning
- Following Distances
- Skid Recovery
- Dealing with distractions
- How ABS works
- How Electronic Stability Control works
- Night Driving tips
- Foul Weather driving
- Preventing animal collisions

Presentation can be customized in order to meet client specifications such as personalized slide backgrounds or subject. Photos of client's vehicle can be used in the presentation in order to enhance learning.
